How to Transform the Enterprise for a Digital Future

Continuous evolution of technology frameworks, and the know-how of workplace members who use them day to day, is a crucial element of efficient organisational outcomes. Government departments recognise the value of investing in Information and Communications Technology (ICT), but for many, the initiative to upgrade and enhance legacy systems remains a challenge.

The riskiest and most expensive approach to ICT is not to modernise at all. We live in dynamic times – with work from home, the pressure of increasingly diverse and digitised citizen demands, and many compounding cyber threats highlighting the impact of complete system outages. These challenges prove that system modernisation is a vital priority for the public sector. We cannot simply ride on the backs of legacy systems that were built for a different age and expect these to deliver to new expectations.

Digital innovation and legacy migration requires time, care, and resources - all of which often become the greatest barrier to getting started. However, with sufficient lower-cost frameworks, adequate staff training, and correct implementation, positive change and organisational objectives can be attained and thereafter aid the realisation of government's goals.

That is why the PSN have put together this **'Modernising Legacy Systems'** Training - to arm professionals working within public sector IT and technology divisions with applicable tools and strategies ready to envisage a modern way of working with IT as an organisation, reimagine existing software architecture, and adequately migrate legacy systems to new and improved technologies.

Packed with theoretical and practical knowledge from your expert facilitator and chance for interactive group discussions and sharing, this training will equip attendees as they rethink IT approaches, imbed smarter emerging technologies like automation and analytics, and continue developing the way public sector IT divisions contribute to Australia's digital future.

Not Just a **Training Session**

Leave with refreshed strategies that can be applied to any IT framework to ensure your whole organisational function is optimal and integrated

Walk away with a course content pack including slide decks, session recordings and templates

Considering what investment lies in reshaping IT systems through a more modernised technological lens

Explore the benefit of looking to digital innovation and emerging tech to respond to inevitable disruptions and minimise costs

Key pillars involved in ICT's potential impact on policy implementation and the realisation of government's goals and objectives

Who **Attends**

The **'Modernising Legacy Systems'** training has been specifically designed for public sector professionals working within IT, Technology and Innovation roles looking to strengthen organisational capacity and further understand how up-to-date systems and processes can be implemented in the safest, most cost-efficient manner.

Explore the Agenda

Module One -

10:00am PSN Welcome and Introductions

10:05am Training Overview, Objectives and Outcomes and Icebreaker

10:20am Deploying the Modern, Cost-Effective IT Framework of the Future - An Introduction

11:00am Distilling the Challenges and Obstacles of Legacy Systems to Refine Your Modernisation Strategy

11:30am Breakout Activity

11:50am Morning Tea Break

Module Two -

12:20pm Outlining Where Current IT Systems and Investments Sit - What can stay, what needs to go?

1:00pm The Key Components to Advancing Existing Software Functionality and Becoming More Agile

1.30pm Breakout Activity

1:50pm Day One Close

Module Three - Application & Evaluation

10:00am **Group Project: Project Brief**

10:30am **Group Project:**

11:20am **Morning Tea Break**

11:40am **Group Project:
Pitch and Share**

- Present your mini-project with the group
- Benchmark against your peers

12:30pm **Group Project:
Evaluation and Feedback**

- Peer-review fellow participants projects
- Receive professional feedback and constructive criticism from facilitator

1:30pm **Summary and Closing Notes from Facilitator**

2:00pm **Day Two Close**
