

Advancing Digital Healthcare to Create Seamless Care Journeys

Part of the Health & Human Services National Insights Series

Online → Wednesday, 2 March 2022 | 11am - 1:10pm AEDT

Your Inspiring Speakers

AMANDA CATTERMOLÉ
Chief Executive Officer
Australian Digital Health Agency

TONY KRIZAN
CFO, CIO, Executive Director
Corporate Operations & Information
National Health & Medical Research Council

KAROL PETROVSKA
Director of Virtual Care
NSW Ministry of Health

ARINDAM CHAUDHURI
Executive Director,
Digital Health
Northern Adelaide Local Health Network

GEORGE BRAITBERG
Professor of Emergency
Medicine Research
Austin Health

BRENT RICHARDS
Medical Director of Innovation &
Commercialisation
Gold Coast University Hospital

MARC BUDGE
Clinical Director,
Integrated Care Services
Bendigo Health

KATE RENZENBRINK
Chief Nursing and Midwifery
Information Officer
Western Health

LEARNÉ DURRINGTON
Chief Executive Officer
WA Primary Health Alliance

LYN RADEL
Nursing Director Digital Health,
Digital Health Solutions
Mackay Hospital & Health Service

DR CHRISTOPHER OLDMEADOW
Associate Director, Clinical Research
Design and Statistical Services
Hunter Medical Research Institute

SARAH MATT MD
VP Healthcare Markets
Oracle

Benefits of Attending

Uncover crucial insights to navigate a new operating environment and infrastructure defined by distance and demand for personalised, shared and intuitive care

Learn how to unlock the potential of existing and future investment into digitalisation and data technology and its application for data-driven and outcome-based care

Discuss the leadership, implementation and improvement science, frameworks and strategies that empower and enable a digitally-adept and patient-centric workforce

Equip yourself with the tools and firsthand case studies to improve digital strategy implementation for increasing demands in patient experience and outcomes

Advancing Digitally-Enabled Patient-Centric Systems

Join us to kick off the first quarter of 2022, a radical year of disruption for the **Australian Health and Social Care Sector** in an unprecedented global post-pandemic age. The risk of not exponentially advancing becomes greater than the risk of “doing things the way they’ve always been done”. The rapid evolution of global health systems, patient-centric design and digital enablement is no longer in “the future”; it is in “the now”.

With higher pressure on resources, shifting population needs, growth in healthcare expenditures and evolving consumer expectations for better patient experience and outcomes, the emphasis is on delivering more value with less.

We will discuss the future of telehealth, remote and shared care, as well as digital’s increasing part in enabling Australian Healthcare Systems; focussing on lessons learnt, applications of technology and how data is used to drive real value and patient outcomes. Evolution in leadership and change management capabilities are vital for embracing new developments, driving supportive cultures, collaboration, and workforce readiness for the coming years.

Who You'll Meet

Chiefs/Directors/Heads/Managers of :

- Clinical
- Medical
- Nursing
- Information, IT
- Digital Transformation
- Customer, Consumer and Patient Experience
- Innovation
- Telehealth
- Data & Analytics
- Strategy, Systems, Planning
- Workforce, People and Culture

Explore the Agenda

11:00am PSN Welcome

11:15am **Welcome from Chair: The State of Australia's Digital Uptake and Patient Centricity**

Amanda Cattermole, *Chief Executive Officer, Australian Digital Health Agency*

11:30am **Government Keynote: A Systems Approach to Digitally-Enabled, Patient-Centric and Sustainable Care - What Will It Take?**

- Digital's role in a more patient-centric, integrated and resilient health and social care model, and what this means for the future
- Co-designed, interconnected and innovative healthcare models, systems and planning

Marc Budge, *Clinical Director, Integrated Care Service, Bendigo Health*

11:45am **Government Case Study: Health informatics and data science to facilitate data-enabled care**

- Translating data into real, actionable, strategic and care-based patient outcome improvements
- Real time, linked big-data for clinical decision making
- What needs to be in place for successful data-led insight: infrastructure, quality, governance and ethics

Dr Christopher Oldmeadow, *Associate Director, Clinical Research Design and Statistical Services, Hunter Medical Research Institute*

12:00pm **Partner Session: Real-Time Data-Informed Decision-Making for Optimised Workflows**

- Managing the complexity and growth of “health” data
- Seeing data from the perspective of both the consumer and providers
- Real world applications of technology to address these challenges

Sarah Matt MD, *VP Healthcare Markets, Oracle*

12:15pm **Government Keynote:**

Leadership and Workforce Readiness to Realise Truly Data-Informed, Patient Centric and Value-Driven Care

- Leadership, change management, policy and culture using implementation and improvement science, and analytics
- What customers and clinicians need from leadership to ensure quality, safety and satisfaction during business transformation
- The role that communication, partnerships and in collaboration plays for a successful, interconnected and integrated operating system

Kate Renzenbrink, *Chief Nursing and Midwifery Information Office, Western Health*

It was great to get the insights from a range of speakers.

Australian Primary Health Care Nurses Association

12:30pm Break

12:35pm **Panel Discussion 1**
Beyond Telehealth - The Rise of the Virtual and Shared Care Environment

- For the ultimate aim of improving patient outcomes, what are the greatest impact areas to evaluate when defining, supporting and integrating new models of virtual care?
- How can we support equity of access for virtual care?
- How can we build the evidence to support decision making and provisioning around quality, safety, and workforce in virtual care?
- How can we best approach the funding, governance, leadership and policy issues relating to virtual health care transformations during and after COVID-19?
- What are your top tips to best prepare our people and workforce for what's to come?

MODERATOR: Amanda Cattermole, *Chief Executive Officer, Australian Digital Health Agency*

George Braitberg, *Professor of Emergency Medicine Research, Austin Health*
Learne Durrington, *Chief Executive Officer, WA Primary Health Alliance*
Karol Petrovska, *Director of Virtual Care, NSW Ministry of Health*

Panel Discussion 2
High-Tech is already here. What are we missing? - Partnering Health and Technology

- Lately, digitalisation and automation advances and disruption in healthcare is evident. What can we learn from the last two years?
- How can healthcare continue rapid change, decouple from legacy infrastructure, and become more efficient, effective and customer friendly. What's missing?
- What role does leadership, change management and culture play in partnering with technology solutions?
- What are your top tips in overcoming major digital transformation challenges?

MODERATOR: Brent Richards, *Medical Director of Innovation and Commercialisation, Gold Coast University Hospital*

Arindam Chaudhuri, *Executive Director Digital Health, Northern Adelaide Local Health Network*

Tony Krizan, CFO, CIO, *Executive Director Corporate Operations & Information, National Health and Medical Research Council*

Lyn Radel, *Nursing Director Digital Health, Digital Health Solutions, Mackay Hospital and Health Service*

1:05pm Close

Thank you to our **Event Partners**

ORACLE

I really enjoyed the session. It was **very interesting and informative.**
