Benefits of Attending

Hear from your peers from as they look to tackle the current challenges IT infrastructure systems face in the Public Sector

Discuss how to integrate existing IT services into well-rounded ecosystems, utilising a range of applications, hardware, software and management technologies in IT service delivery

Hear how innovative IT strategies and processes are transforming government services and helping to deliver positive outcomes to citizens

CLICK HERE TO REGISTER

Enabling a Technology-Driven Government

The adoption of innovative IT technologies within the NZ public sector is accelerating rapidly, with exciting new tools and applications becoming increasingly utilised to enable greater efficiency outcomes within government organisations. This is especially imperative as we expand upon our nation's Digital Inclusion Strategy to make sure all New Zealander's have access to fair and deliverable services.

However, as the adoption of these modern processes enhances organisation-wide IT systems, the question of implementation and sustainable infrastructure will inevitably become more pressing - especially as we look to continuously build digital skills and capabilities to advance processes, citizen services, and showcase measurable public outcomes.

To discuss ways of prioritising these advancements in the most cost-effective, holistic, and publicly viable way, we've put together the first Virtual Event in our **2022 Innovation & ICT Community National Insights series for New Zealand**. Tune in to hear case studies from innovative peers and discuss how to accelerate the public sector's understanding of what fruit modern, digitally enabled and integrated IT infrastructure strategies could yield for Aotearoa's public sector.

The assorted challenges and complimentary aspects of all things IT and Innovation will be addressed in two concurrent panel sessions, allowing you to choose the one that piques your own relevant interest most.

Who You'll Meet

Chiefs/Directors/Heads/Managers of:

- Business Technology Services
- Enterprise Architecture
- Business Intelligence
- Technology
- Digital Transformation
- System Application
- Application Development
- ICT Integration
- Enterprise Solutions

Explore the Agenda

9:00am	**PSN Welcome**
9:10am	**Welcome from Chair**
9:20am	**Government Keynote:** Maximising New Innovation & IT Initiatives to Deliver NZ's Digital Inclusion Strategy

- How can we ensure capabilities extend to, and assist, citizens in regional areas and avoid worsening digital exclusion?
- What are the necessary infrastructures needing to be addressed and secured before we move forward with new innovation strategies?

Andrew Stephen, *Enterprise Architecture Consultant,* **Department of Internal Affairs**

9:35am	**Partner Session:** Enhancing Public Service Value with Emerging Technology
9:50am	**Government Case Study:** Realising Value Through Our People and Our Partners

- Identifying and prioritising the tools and processes needed to ensure automation can deliver effectively

Mary Craig, *Deputy Commissioner Enterprise Design and Integrity,,* **Inland Revenue Department**

10:05am	**Partner Session:** Deploying the Modern, Cost-Effective IT Framework of the Future
10:20am	**Government Keynote:** Ensuring IT Transformation is a Whole-of-Staff Skillset

- How IT leaders can best take staff on the transformation journey with them
- Balancing technology, people and processes to avoid common integration pitfalls

Gerhard Kessell-Haak, *Chief Enterprise Architect,* **Education Payroll**

"

First time exhibitor at short notice. PSN went out of the way to accommodate us, and we got a lot of value out of the event and significant leads. The exhibitor application worked well.
