# About Public Sector Network

**Public Sector Network** is a research company that represents public sector professionals across Australia, Canada, New Zealand, and the USA. We develop research, roundtables, events, and webcasts to suit current areas of interest to government agencies and their suppliers.

The public sector consistently faces shrinking budgets and growing expectations, forcing them to be one of the most innovative and resourceful industries in the world.

Regardless of department, agency, level of government or geography, public sector employees are all striving to tackle similar challenges and priorities.

**Join Public Sector Network's communities of practice to share ideas and insights, and to access to the latest research.**
