

Communicating Risk and Mitigating Threats in a Changing Cyber Security Landscape

Part of the Cyber and Risk Management National Insights

Online → Wednesday, 16 February 2022 | 9am - 11am NZDT

Your Inspiring Speakers

RUDO TAGWIREYI
 Director of Digital Security & Risk, Information Technology Services
 University of Canterbury

CHRIS BUXTON
 Director Agency Partnerships, Digital Public Service Branch
 Department of Internal Affairs

DOUG TALBOT
 Chief Information Officer
 Environment Canterbury

BILL MOSES
 Chief Information Officer
 NZ Public Service Commission

VIMAL KUMAR
 Senior Lecturer, Head of the Cyber Security Lab
 The University of Waikato

NALIN ARACHCHILAGE
 Lecturer in Cyber Security & Privacy Cyber Security Foundry
 The University of Auckland

JONATHAN WILKINS
 Chief Information Security Officer, Security & Privacy Directorate, Corporate Services
 Ministry for Primary Industries

SPEAKER
 GCSB National Cyber Security Centre

CAROL COTTAM
 Manager, Information Services & Technology
 Northland Regional Council

SUE MCLEAN
 Chief Information Officer
 Greater Wellington Regional Council

PETER PHILIPP
 General Manager, ANZ
 Neo4j

LECH JANCZEWSKI
 Associate Professor, Information Security,
 University of Auckland

Benefits of Attending

Learn how to communicate cyber security risk to all levels of an organisation

Gain insight into the latest methods of protecting data and devices from cyber attacks

Explore real world case studies to improve resilience in an ever-changing threat landscape

Discover how to lead your organisation through the next phase of its cyber journey

[CLICK HERE TO REGISTER](#)

Adapting For a More Resilient Enterprise in the Next Normal

As we look to the future of cyber security and what it means for New Zealand organisations, increasing resilience and protecting critical data remains paramount. As threats evolve and change, a strong cyber strategy and deploying cutting edge technology can reduce vulnerability and strengthen defences.

Planning for potential threats and preparing methods to counter a breach, while daunting, can help an organisation to protect the security of their networks and critical data. Conveying the importance of cyber planning and implementation across all levels of government aids in uniting leaders and workers against bad actors. It is necessary for cyber security to become a priority across all departments.

PSN's virtual **National Insights - Biannual Edition** event, delivered by experts in their field, will examine how to navigate changes in government policy and understand your level of maturity. Thought leaders will discuss their approach to cyber strategy and resilience. It will highlight case studies and provoke conversation to help you guide your organisation to a smarter, more secure cyber future.

Who You'll Meet

Chiefs/Directors/Heads/Managers of :

- Cyber Compliance
- Cyber Security
- Information Management
- Cyber Policy
- Information Technology
- Risk Management
- Information and Privacy
- Cyber Governance

Explore the Agenda

9:00am PSN Welcome

9:15am Welcome from Chair

Rudo Tagwireyi, *Director of Digital Security & Risk (CISO), Information Technology Services, University of Canterbury*

9:30am **Government Keynote:**

Communicating Cyber Security Risk in a Meaningful Way

- Understanding the cost to business of security breaches
- Creating a strategy for change and helping an organisation understand why it is necessary
- Conveying the importance of strengthening defences with emerging technology to protect data

Chris Buxton, *Director Agency Partnerships, Digital Public Service Branch, DIA*

9:45am **Government Keynote:**

Building Resilience to the Evolving Cyber Threats Facing New Zealand Organisations

- Mitigating the risk of a data breach
- The future of cyber security
- Improving your organisations security defences

GCSB Representative, *GCSB's National Cyber Security Centre*

10:00am **Partner Session:**

The Role of Graphs in Government

Government agencies, securities and law enforcement across the world are leveraging the power of graph data platforms, helping them to accurately assess the risk and cybersecurity threats they potentially face. Graphs allow agencies to add in defenses and how much is needed to invest to be adequately protected. In the battle for more robust cybersecurity, agencies need to know their enemies and exactly how they operate. When this is understood, they can be outsmarted.

Peter Philipp, *General Manager ANZ, Neo4j*

10:15am **Government Keynote:**

Thinking differently about risk while delivering digital products

- What are the key risks in a modern digital delivery?
- How can we better mitigate these risks?
- What is Environment Canterbury doing to meet this modern challenge?

Doug Talbot, *Chief Information Officer, Environment Canterbury*

Very well run. Great participation and good-sized crowd. Very happy with this.

Okta

10:30am Break

10:35am Panel Discussion 1

Device and Data Protection in an Ever-Changing Threat Environment

- How to prevent ransomware attacks against your network
- How do multi-layered security defences protect your data and devices?
- How do data privacy, notifiable breaches and cybersecurity combine to protect your organisation?
- Response and recovery when a breach occurs

Jonathan Wilkins, *Chief Information Security Officer, Security and Privacy Directorate, Corporate Services, Ministry for Primary Industries*

Vimal Kumar, *Senior Lecturer, Head of the Cyber Security Lab, The University of Waikato*

Carol Cottam, *Manager, Information Services and Technology, Northland Regional Council*

MODERATOR: Rudo Tagwireyi, *Director of Digital Security & Risk (CISO), Information Technology Services, University of Canterbury*

Panel Discussion 2

Progressing Your Organisation's Cyber Maturity and Closing the Gap on Vulnerabilities

- How to understand your organisations maturity level
- How to secure a hybrid and multi-cloud environment
- Implementing cutting edge technology to strengthen your defences against threat actors
- What are your top tips for improving cyber resilience and creating a strong cyber strategy?

Bill Moses, *Chief Information Officer, NZ Public Service Commission*

Sue McLean, *Chief Information Officer, Greater Wellington Regional Council*

Nalin Arachchiage, *Lecturer Cyber Security and Privacy, Cyber Security Foundry, The University of Auckland*

MODERATOR: Lech Janczewski, *Associate Professor, Information Security, University of Auckland*
