Revolutionising Data Governance, Information Management & Data Strategy in Government

Part of the National Insights Series Data Management & Analytics Community

Online → **Thursday, 28 July 2022** | 11:00am – 1:00pm AEST

Your Inspiring **Speakers**

PETER WORTHINGTON-EYRE

Chief Data Officer/Executive Director, Office for Data Analytics
Department of the Premier and Cabinet

ADAM BERRY

Deputy Director & Associate Professor, Data Innovation
UTS Data Science Institute

DR. IAN OPPERMANN

Chief Data Scientist
Department of Customer Service

PROTYAY ROY

Assistant Director, IT & Data Governance
Australian Energy Regulator

ELIZABETH TYDD

NSW Information Commissioner, CEO
Information & Privacy Commission & Open Data Advocate

KIM WEIMER

Assistant Director, Regulatory Data & Analysis
Essential Services Commission of SA

DELLA ZHUANG

VP of Growth APAC
Ataccama

Benefits of Attending

Hear the most recent developments and benchmark with your peers in data governance, management, and strategy across the state and federal public service.

Discover insights, perspectives, and practices to better incorporate data strategy & governance into organisational practice, gain stronger stakeholder buy-in, and enable a more supportive data ecosystem.

Prepare for the future of data governance with the latest news, insights, and legislative updates to address information access, privacy, and risk.

Join your fellow data advocates and stewards within different organisations for dynamic case-study and best-practice-sharing to further enable data as an asset.

Cutting through Complexity to Deliver Clarity for Actionable Insights

Organisations on the data transformation journey are faced with ever-increasing complexity and competing priorities. To manage data decisions in this environment comes with reinforced responsibility to ensure quality of data inputs, governance framework design and implementation, and maturity of the workforce.

This quarter, we will be exploring the specific challenges and hallmarks of effective governance, leadership and culture, to consistently translate data into a valuable business asset. The role of metadata, agility development and proactive data stewardship in the data environment comes in when integrating the data strategy with both the IT and organisational strategies. In addition, we will be delving into the important user-centric aspects of information management including privacy and preserving the right to access information in digital government.

Join us at the complimentary **"Revolutionising Data Governance, Information Management & Data Strategy in Government"** virtual event to stand for the realisation of data as a strategic asset. Let us come together with collective wisdom and collaboration to advance the effectiveness of our digital government for greater innovation, societal and citizen benefit.

Who You'll Meet

Chiefs/Directors/Heads/Managers of:

- Data, Data Strategy
- Information Access, Open Data, Data Sharing
- Privacy, Data Risk, Data Assurance
- Information Management

- Data Steward, Data Leadership & Governance
- Data Rights & Ethics
- Data Architect

Explore the Agenda

11:00am   **PSN Welcome**

11:15am   **Welcome from Chair: From Protective to Effective Governance**

Peter Worthington-Eyre, *Chief Data Officer/Executive Director, Office for Data Analytics,* **Department of the Premier and Cabinet**

11:30am   **Government Keynote: Using Data Governance as an Enabler Rather Than a Barrier or Checklist**
- Taking a step back to the "why" of data governance, and integrating this purpose into designs, culture, frameworks and the way we work
- Embedding & implementing the notion of data governance being more than an end in itself
- Making data governance and data dictionaries accessible for the user, changing culture and improving staff confidence

Kim Weimer, *Assistant Director, Regulatory Data & Analysis,* **Essential Services Commission of SA**

11:50am   **Government Case Study: Tackling New Challenges & Next Steps for Information Access in a Digital World**
- Case study examples of challenges and implementation (silos, cross sector initiatives and machine enhanced decision making)
- What it takes to reimagine information access in a digital age
- Top tips and solutions to mitigate risks and approach contractual agreements

Elizabeth Tydd, *NSW Information Commissioner, CEO,* **Information & Privacy Commission & Open Data Advocate**

12:05pm   **Government Keynote & Case-Study: Embedding a Robust Enterprise Information Management Governance Framework**
- Working with stakeholders from across the enterprise to develop an governance operating model
- How this operating model was operationalised within the enterprise
- Learnings and take-aways from our enterprise IM and governance journey

Dr. Ian Oppermann, *Chief Data Scientist,* **Department of Customer Service**

12:20pm   **Break**

12:25pm	**Panel Discussion**

Reimagining Data Programs for Business Value – An Integrated Data, Business & IT Strategy

- What are some important considerations when approaching the role and responsibility of a proactive data stewardship, business value, strategy and leadership within our organisations?
- How do we appropriately set up frameworks for successful, ethical and responsible engagement with end users?
- What are your top tips on mid to long term investment in data evolution, agility development, data engineering and ready-made data architecture?
- How can we continue to improve effective data communication, capabilities & collaboration across internal data communities, departments and across government to tackle systemic data challenges?

Facilitator: **Della Zhuang,** *VP of Growth APAC,* **Ataccama**

Adam Berry, *Deputy Director & Associate Professor, Data Innovation,* **UTS Data Science Institute**
Protyay Roy, *Assistant Director, IT & Data Governance,* **Australian Energy Regulator**

1:00pm	**Close**
