Healthcare Infrastructure

Digital and technology applications for a more sustainable, integrated and patient-centric healthcare system

Tuesday, October 4, 2022
Chelsea Hotel Toronto | 8am ET

Agenda at a glance

To create a more prepared Canadian Healthcare system, officials must prioritize longevity, resilience, data protection and seamless digital operations. Redesigning and upgrading your health infrastructure to adapt and leverage innovative technology is an on going journey that requires continuous improvement and cross-departmental collaboration. To better support the healthcare provider and patients, opportunities must be identified to leverage technology to evolve with the digital landscape with the goal to enhance delivery, accessibility and efficiency of healthcare services.

The **Healthcare Infrastructure Conference,** will provide opportunities to hear from key leaders in Canadian Healthcare as they share their journeys to successfully implementing digital and smart solutions throughout their healthcare organizations. Let's embrace innovation and digitalization of healthcare services - Together, we can work towards a future-proofed Canadian Healthcare System for all.

"

I really appreciated the experts from such a broad spectrum of Public Sector Health Services across the country. The presentations had depth as well as breadth.

IT'S FREE! REGISTER TODAY

Who You'll Meet

- Hospitals and healthcare facilities, provincial/regional health authorities

Chief/Head/Director of:

- Clinical
- Infrastructure
- Capital Works
- Information Technology
- Nursing
- Workforce
- Corporate Services
- Operations
- Policy Advisors
- Analysts
- Digital Solutions
- Digital Officers

Benefits of Attending

Join this exclusive in-person event to discuss strategies, solutions and best practice with 20+ public sector health leaders

Network and benchmark with your peers to learn how to digitally transform your healthcare organization to create a connected digital healthcare infrastructure

Engage in live and interactive Q&A panel sessions to unlock how to drive value from healthcare data and improve patient-centricity

Learn how to leverage emerging technologies to accelerate digital transformation in healthcare

SPECIALIST TRACKS		
	Smart Health Facilities Track	**Digital Health Infrastructure Track**
11:30am ET	Welcome from the Track Chair: **Smart Hospitals: Future-Proofing Canada's Facilities for Flexibility, Sustainability, Patient Centricity and Care Excellence**	Welcome from the Track Chair: **Improving Clinical Governance, Operational Efficiencies and Patient Outcomes through an Integrated Digital Healthcare Strategy** **Todd Wilson,** Chief Strategist, **Red Hat**
11:50am ET	Government Keynote: **Improving Alignment Between Health Infrastructure and Integrated Services Planning** **Cliff Harvey,** Chief Planning Officer, **Niagara Health**	Government Keynote: **Enabling the Digital Patient: Patient Engagement Enabling Better Care Accessibility through Digital Health Innovation** • Share highlights from North York General's Digital Health Strategy, including its vision to create a connected, person-centered community health system • Discuss strategies for engaging patients and caregivers in digital health innovation • Provide examples of patient and caregiver digital health innovation projects, including valuable lessons learned **Duska Kennedy,** Chief Digital Officer, **North York General Hospital**
12:10pm ET	Gold Partner Session: **A Place to Heal – Creating Intelligent Environments to Support Patient Recovery**	Gold Partner Session: **Beyond the Walls of a Traditional Health Facility – Augmenting Capabilities to Deliver Care with Cloud-Based Enterprise Imaging** **Nader Soltani**, President, **Sectra Canada Inc.**

12:30pm ET

Government Keynote:

Project to Operations: Creating Sustainability and Embedding it into the DNA

Healthcare organizations are implementing a range of transformational projects. These range from building a new structure, redesigning a facility, performance/quality improvement, technology improvements. These projects are often costly in terms of dollars and resources. But how does an organization move from "project mode" to operations—taking all of the learnings and create a sustainable model.

- What are the challenges of moving from project to operations?

- What does it take to create a successful operating/sustainable model?

Lyn Baluyot, President & CEO, **TransForm Shared Services Organization**

Government Keynote:

Accelerating Transformation in Healthcare - Enabling Shifts to Predictive, Preventative, Personalized and Participatory Care

With a lens through the acute care hospital system, we will try to look at some of the following issues:

- Can Artificial Intelligence be incorporated by acute health care facilities to enhance care?

- How can we keep our patients involved in their health care journey before, during and after their hospital visit?

- How we can keep our aging population as active participants in this transformation.

David Rauchwerger, Chief and Medical Director of the Emergency Medicine Program and Sexual Assault and Domestic Violence Program, **Mackenzie Health**

12:50pm ET

Gold Partner Session:

Smart Answers to Hospital Pressures - Improving Treatment, Efficiency and Outcomes Through Technology and Innovation

Dr. Indra Joshi, Population Health and Value Based Care Executive, **Palantir**

Gold Partner Session:

Case Studies in Virtual Care, Data Analytics and Cloud Adoption in Canadian Healthcare

Peter Jones, Healthcare Industry Lead**, Microsoft**

"This event provided the opportunity to engage and learn from digital health leaders throughout the day. I also appreciated the ample time to speak with fellow attendees between sessions."

Mohawk College & Burlington OHT

SPECIALIST TRACKS

Smart Health Facilities Track	Digital Health Infrastructure Track

1:10pm ET

Panel Discussion:

Smart Solutions for the New Normal

Hospitals must excel in the new normal, and digitalization is key. It will revolutionize the human experience, minimize exposure to risks and change both financial and operational aspects too.

- Addressing climate change for sustainable healthcare
- Given our current stage along the technology maturity journey, what opportunities exist to personalize, simplify, automate and streamline services to create value now, as well as in the future?
- Inclusive design experience – How can we co-create successful outcomes with patients, caregivers, employees and community partners
- Big picture vs business of today - How do we work towards our vision of a smart hospital whilst juggling the daily demands of running a facility

- Joanna Yang, Senior Director, Enterprise Architect, **The Hospital for Sick Children**

- Ian McDermott, Executive Director, Planning & Integration, FM-PRO, **University Health Network**

- Dr. Carmine Simone, Vice President Medical Affairs, **Michael Garron Hospital**

- Scott King, Senior Sales Manager, Enterprise Vertical Lead - Healthcare & Education, **Samsung Electronics Canada**

Panel Discussion:

Advancing Health in The Modern World: Where do we go next?

- Moving beyond patient medical records implementation to system value creation
- Navigating through the flooded digital health tools ecosystem for optimal patient outcomes
- Taking steps to integrate tools into the health system for a more connected system
- Making digital adoption more manageable for the patient, and care providers
- Sustainably scaling telehealth and new models of virtual care

- Jeff Curtis, Chief Privacy Officer, **Sunnybrook Hospital**

- Andriana Lukich, Director, Digital Solutions, **St. Joseph's Healthcare Hamilton**

- Alexis Villa, Senior Program Director, **UHN Connected Care & Altum Health**

Aviviere Telang, Global Strategist & Digital Advisor, **Hewlett Packard Enterprise**

Moderator: **Todd Wilson,** Chief Strategist, **Red Hat**

1:45pm ET   **Networking Lunch Break on the Exhibition Showfloor**

2:50pm ET

Ruby Partner Keynote:

The Pandemic Years in Review - How Can We Create a More Prepared Canadian Health System

Ted Scott, Vice President Research and Chief Innovation Officer, **Hamilton Health Sciences**

3:10pm ET — Platinum Partner Session:
Identifying the New Cyber Vulnerabilities in Connected Health Ecosystems
Sean Landicho, Partner, **KeyData**

3:30pm ET — Fireside Chat:
High-impact Digital Strategies to Improve Patient and Provider Experiences

- **Angela Tibando,** Digital Excellence in Health Executive, **Ontario Health**
- **Alexandre Bourque,** Director and Product Lead, Digital Product Management, VaccineConnect, Digital Transformation Branch, **Health Canada**

3:50pm ET — Platinum Partner Session:
Setting Your Project up for Success: Examining the Importance of Relationships During Complex Projects

4:10pm ET — Panel Discussion:
Innovation by Necessity vs. Innovation by Strategy: Shifting Gears to Build a Sustainable Approach to Healthcare

- Defining the pillars for innovation: Demonstrate, evaluate, scale and sustain
- Rethinking approaches to innovation to evolve in-sync with the patients, clients, and customers
- Key learnings: The importance of the 'test, fail, redo' cycle
- Identifying new opportunities for improvement in healthcare
- Setting up for Success: How to create innovation by strategy within a governance structure

- **Mehdi Somji,** Director, Innovation & Partnerships, **Trillium Health Partners**

- **Bonnie Scott,** Regional Digital Lead and Director, Digital Transformation and Innovation, **Ontario Health West**

- **James Schembri,** Director, **Scarborough Ontario Health Team**

4:40pm ET — **Closing Remarks from the Chair**

4:50pm ET — **Networking Drinks**
