Enhancing State Government Procurement with Emerging Technology Strategies

We are now well into an era of continuous change and instability. With the additional challenge of budget constraints, rapid change, public health demands, and economic disruption, procurement professionals are now turning to automation and technology to fulfil business objectives, and level up back-office processes and workflows. All while working under the driving imperative for public sector corporate functions to ensure spend management and supply chain priorities ultimately work to benefit and care for citizens' needs.

So which tools, technologies, and strategies need to be involved in the modern approach to procurement within government?

To help optimise and further evolve your department's procurement approach, we've put together this state specific gathering to provide a platform for exploring emerging technologies, techniques and real-world case studies addressing all things related to the enormous responsibilities of the back-office.

The **2022 Corporate & Shared Services Series** is all about discerning how we can further create modern, digitally enabled and integrated public sector corporate divisions in Australia and New Zealand, furthering the discussion around how corporate functions of the future could work to increase profitability and scale, optimise costs, and improve efficiencies in times of economic disruption and change.

The series will head to 7 cities across Australia and New Zealand to benchmark the key challenges faced by the public sector in each state and country.

10:30am **Gold Partner Session: Building circularity and carbon into procurement processes**

- Defining sustainable procurement
- The carbon management hierarchy in procurement
- Key factors for a circular economy during procurement
- Measuring the impact

Stefano Ferrarini, *Senior Manager, Grosvenor Performance Group*

10:50am Morning Tea and Networking Break

11:20am Concurrent Roundtable Discussions -

Roundtable 1

Enhancing Procurement Processes With Automation

An organisation's procurement process can act as a red herring to overall operational efficiency, with a domino effect of consequences from the top down if things get messy. Automation is fast becoming the favoured route to optimising supplier onboarding, invoice management, purchase order management, and contract approval – speeding up complicated manual-based systems and keeping costs low without needing to hire any new employees or making a drastic IT investments. With automation acting as a central repository for more visible procurement spend management, business-critical activities like decision-making and strategising can come to the fore once again, as they should.

Andrew Beard, *Senior Consultant, SS&C Blue Prism*

Roundtable 2

The practical steps to build circularity and carbon into procurement processes

- Practical application of including carbon and circular outcomes in your procurement
- What evaluation criteria could i use
- How to do due diligence
- Supplier engagement tips

Nicholas Leask, *Associate Director, Grosvenor Performance Group*

Roundtable 3

Social Procurement and the Impact of Innovation - Changing How Successful Procurement Outcomes are Measured

- NSW and VIC jurisdictions are looking to rebuild their manufacturing and technology sectors through sourcing strategies aimed at local businesses. At the same time, many Departmental Secretaries have challenged their organisations to an innovation agenda.
- For many organisations these initiatives will mean taking a risk with new untested industry players - some of them even new entrants. It will also mean sourcing products and services from smaller local players who by definition can only deliver outcomes when teamed with other providers. The end result is almost certain to involve higher risk investments spread across a far bigger supplier base - a real challenge for local procurement teams.
- What does all of this mean for procurement professionals? How do we achieve value for money and transparency in a competitive market while meeting these new social KPIs?

Peter Grant, *Partner, Bnimble*

12:20pm Panel Discussion: The Modern and Agile Procurement Professional - Discussing Top Challenges, Priorities and Desirable Skills

- What opportunities are there for improving procurement accuracy and efficiency with Automation?
- How can each organisation look to modernise procurement processes with new tools to add value, reduce costs, and simplify control across all divisions?

AJ Karliner, *Chief Procurement Officer, VIC Police*

Jenny Zitzlaff, *Procurement Manager, Department of Environment, Land, Water and Planning*

Travis Scott, *Contracts and Category Management Specialist, Department Of Environment, Land, Water and Planning*

Diem (Yim) Huynh, *Chief Operating Officer, Mia*
