National Insights - Fall Edition

IT for Smarter, More Efficient, Citizen-Centric Outcomes

Online → Thursday, September 15, 2022 | 12:00 - 2:00pm ET & 9:00 - 11:00am PT

Your Inspiring Speakers

KALYAN CHAKRAVARTHY

Chief Information Officer
The Regional Municipality of Durham

PENNY RAE

Chief Information Officer
Alberta Health Services

SOMAIEH NIKPOOR

A/Lead - AI Strategy and Data Science
Transport Canada

ELIZABETH RHODENIZER

Director General
Shared Services Canada

APRIL HOWE

Deputy Minister, Fisheries and Aquaculture
Nova Scotia Government

ERIC HEIN

Director of Partnerships and Marketing
Orangutech

ADAM FOURNIER

Director, Solution Engineering
VMware Tanzu

STEVE WITT

Director, Public Sector
Nintex

ZACH COHEN

Senior Alliances Manager
WalkMe

CHRIS HIBBITS

Account Director, Canada
WalkMe

Benefits of Attending

Assess the technological landscape and implement best-fit IT initiatives

Update legacy applications to improve operational efficiency

Get to grips with how to leverage artificial intelligence and machine learning to enhance service delivery

Create a framework which will enable IT to deploy business applications and workloads anytime, anywhere and improve productivity

CLICK HERE TO REGISTER

IT for Smarter, More Efficient, Citizen-Centric Outcomes

All levels of government are increasingly committed to leveraging technology to facilitate a more collaborative and efficient public service. To achieve this, CIOs and senior public sector executives must get to grips with how to fully navigate and implement the latest technologies to drive success. Strategies and operations must also shift accordingly, or organizations risk undermining the quality of government services and capacity to deliver value to their citizens.

By ensuring a strategic, and holistic approach to information technology investments and implementation, the public sector can improve service delivery, ensure that networks and information are more secure, and deliver better value for money.

The Fall edition of National Insights in IT will probe the plethora of technological solutions available and key strategies for improving operational efficiency to drive successful technological implementation and customer-focused, cost-efficient outcomes.

Who You'll Meet

- CIO/CTO/IT Director
- Chief Architect
- IT Infrastructure
- Enterprise Architecture
- Vendor Management
- IT Operations
- IT Procurement
- IT Applications
- IT Workforce Strategy
- Contract Management
