

Government Data Insights: Summer Edition

Cutting through Complexity to Deliver Clarity for Actionable Insights Online → Wednesday, September 28, 2022 | 12:00pm - 3:00pm ET

Your Inspiring Speakers

KEN PFEIL Chief Data Officer Commonwealth of Virginia

JESSICA CUNNINGHAM Executive Director Kentucky Center for Statistics (KYSTATS)

ANDY MACISAAC Solutions Marketing Director, Public Sector

Altervx

MARCUS THORNTON

Deputy Chief Data Officer

Commonwealth of

Virginia

PORTER SHOMO Regional Vice President, Public Sector Altervx

ADAM LEONARD Director of Information Innovation & Insight Texas Workforce Commission

AHU YILDIRMAZ CEO Coleridge Initiative

DR. DAN PUTLER Chief Data Scientist Alteryx

FLORENCE HUDSON Executive Director Northeast Big Data Innovation Hub

ERIC MCCOOL Director of Data and Analytics, Office of

Inspector General Minnesota Department of Human Services

Benefits of Attending

Explore best practices in data governance and organization

Unlock the potential of **automated data process** automation

Cutting through Complexity to Deliver Clarity for Actionable Insights

Governments recognize data's potential to serve citizens according to their needs. More and more of that data is being captured every day. Demand for data – and relevant insights – has never been higher.

Not all departments and agencies, however, are capturing the same data points or even the same types of data. Consequently, public sector data professionals spend an inordinate amount of time on manual collation and manipulation that could be automated, preventing key analyses from being completed and potentially overlooking valuable insights. Additionally, employees without a data-specific title are often overwhelmed by the large volume of data collected without being analyzed.

How can government data professionals enable communication between disparate datasets - without devoting resources to manual manipulation? What best practices exist that reallocate resources away from simply making sense of what's being collected - and toward resources that analyze and unlock valuable information? Why is it critical for departments to upskill all employees in basic data analytics principles?

Public Sector Network's **Government Data Insights Summer Edition** virtual event will bring together public sector data professionals across all levels of government from across the country to discuss a range of top-of-mind topics in data management and analytics. Join your peers in conversation!

Who You'll Meet

Commissioners/Chiefs/Directors/Managers of :

- Data & Analytics
 Data Science & Digital Capability
 - Privacy
- Al, Automation & Machine Learning
- Information Technology & Security
- Technology

ers of : Innovation Cyber Security Digital Applications & Technology Digital Service Delivery Enterprise Infrastructure Digital Transformation

Explore the Agenda

12:00pm ET	Welcome from Public Sector Network
12:05pm ET	Welcome from Chair: From Prep and Blend to Auto ML and AI, Making Analytics for All a Reality
	Over the past decade, every agency has seen the need to uplevel and upskill their approach to analytics and how to create actionable insight. The trends incorporate more and more data into decision making and policy development is not going to end, and every government agency is going to need to find ways to build agile data skills and capabilities. Join Alteryx as we discuss how an analytics for all approach enables government agencies to tackle their toughest data challenges and upskill their analytics capabilities to better serve their constituents, workforce and stakeholders.
	Porter Shomo, Regional Vice President, Public Sector, Alteryx
12:20pm ET	Fireside Chat:
	Update from Virginia's Office of Data Governance and Analytics
	Join Virginia's newly appointed Chief Data Officer, Ken Pfeil, and Deputy Chief Data Officer, Marcus Thornton, for a dynamic conversation where they will outline current projects and future priorities for the Commonwealth's Office of Data Governance and Analytics.
	Ken Pfeil, Chief Data Officer, Commonwealth of Virginia
	Marcus Thornton, Deputy Chief Data Officer, Commonwealth of Virginia
12:45pm ET	Platinum Partner Session: Hurricane Response Planning
	Dr. Dan Putler, Chief Data Scientist, Alteryx
1:15pm ET	Panel Discussion: Analytics for All
	Learn how to democratize analytics processes to ensure that both data specialists <i>and</i> the data uninitiated can leverage insights to develop data- informed policies.
	Florence Hudson, Executive Director, Northeast Big Data Innovation Hub
	Eric McCool, Director of Data and Analytics, Office of Inspector General, Minnesota Department of Human Services
	Moderator: Andy MacIsaac, Solutions Marketing Director, Public Sector, Alteryx
1:45pm ET	Government Case Study: Data Equity Analysis in Kentucky
	What happens when you apply an equity lens to ten-plus years of data collection and reporting? Jessica Cunningham will discuss the Kentucky Center for Statistics' (KYSTATS) first findings from a new report that prioritizes an equity analysis in understanding long-term implications of COVID-19 on Kentuckians.
	Jessica Cunningham, Executive Director, Kentucky Center for Statistics (KYSTATS)

2:10pm ET Government Case Study: Using Your Own Data to Maximize Benefits to your Community Have you ever wondered how to analyze if your plans will have the impact on your community that you hope they'll have? How can you me intangible things the environment and tie it to tangible things live your budget? Join this session to learn how one local government leveraged data that it already had to quantify the environmental benefits of converting vehicle fleet to alternative fuels against the increased cost of purchasing these vehicles. The results might not be what you'd expect! Stephanie Delgado, <i>CEO & Chief Data Officer</i> . DataCents Analytics & <i>Adjunct Professor - Data Science & Impact Measurement</i> , Lynn Univer Developing Common Data Models Data users are developing creative solutions to drastically reduce the amount of time analysts spend making sense of the information and e practitioners to do their work. Common data models automate vital processes, mapping previously siloed data into formats where comparis makes sense. This panel will provide key takeaways for creating common data models in your department - and beyond. Adam Leonard, Director of Information Innovation & Insight, Texas Workforce Commission Jessica Cunningham, Executive Director, Kentucky Center for Statistics (KYSTATS) Ahu Yildirmaz, <i>CEO</i> , Coleridge Initiative Moderator: Andy MacIsaac, Solutions Marketing Director, Public Sector, Alteryx 2:55pm ET Closing Remarks from the Chair Andy MacIsaac, Solutions Marketing Director, Public Sector, Alteryx 3:00pm ET Virtual Event Adjourns
