Adopting and Embedding an Enhanced Cyber Posture for a More Resilient Australia

Cyber security is important for Australia's national security, innovation, and prosperity. As the number and sophistication of cyber attacks increases, so too must the preparation and prevention of these threats. Australian government organisations must continue to improve cyber defences to repel attacks to avoid financial, operational and reputational damage.

Australia is making an unprecedented investment of A\$9.9 billion over 10 years in Australia's national intelligence and cyber capabilities, creating significant opportunities in the Australian cybersecurity industry. Now is the time to implement robust policies, strategies and technologies to protect from future threats.

The **2023 Cyber Security Innovation Roadshow** will delve into the latest cyber-related legislative and policy developments, highlighting the role existing and emerging technologies play in protecting data. Across four cities, each state specific program will showcase key projects, best-practice and insights to demonstrate how government organisations can effectively bolster their cyber defences.

Key Themes

Experience intimate and interactive sessions on the latest cyber threats and opportunities, including ransomware, incident response and collaboration

Explore innovative and emerging technologies that can support your organisation's cyber transformation

Hear about the latest cyber strategies being implemented at leading departments

Network with your fellow public sector cyber leaders within your state

Who You'll Meet

Chiefs/Directors/Heads/Managers of:

- | | |
|--------------------------|-----------------------------|
| ● Cyber Security | ● Digital Transformation |
| ● Information Management | ● Strategy and Architecture |
| ● Technology Policy | ● Assurance and Risk |
| ● Risk Management | ● Privacy |

8:30am Registration and Networking Coffee

9:10am Opening from Public Sector Network & Icebreaker

9:20am Welcome from Chair: Strengthening Defences and Improving Capabilities to Uplift Cyber Security in AustraliaStuart Mort, *Partner, Technology Risk & Cyber, KPMG*

9:35am Government Keynote: Identifying Sophisticated Threats to Strengthen Your Organisation's Response in a Volatile Landscape

- Planning incident response and the importance of testing action plans
- Strengthening your security to protect critical data and protect privacy
- Advancing your protection methods for early detection of malicious activity

Sam Mackay, *Director Security Operations, Department of Customer Service*

10:00am Morning Coffee and Networking Break

10:30am Concurrent Roundtable Discussions**Roundtable 1****Supply Chain Security: Detection and Response Strategies for Third Party Risks**

- Discuss the risks posed by cyber threats in your IT supply chain
- Share risk management strategies related to supply chain cyber attacks

Richard Stocks, *Threat Intelligence & XDR Specialist, Rapid7***Roundtable 2****The Final Missing Piece Of Any Organisation's Cyber Security Strategy**

Join Rubrik for a discussion on why recovery is critically important and often not discussed. Topics under discussion will include:

- What measures do you put in place to minimise the impact of any cyber incident?
- What measures do you put in place to minimise the impact of any cyber incident?
- Does your organisation truly have an assume breach mindset?
- In our roles what are we really mitigating against?
- What potential could be realised when all organisations operated with a cyber confidence?
- When was the last time you tested your cyber recovery capability?

Alister Freese, *Account Executive, Rubrik***Roundtable 3****Challenges across data protection and privacy**

- Australia's Privacy Journey
- State and Territory Privacy Landscape
- Privacy Act Reform Highlights
- Key Concepts and Takeaways from the Privacy Reforms
- Challenges, Cyber Attack and Guardrails to minimise the impact
- Unlocking Strategic Advantages and Using Privacy/Data as a Competitive differentiator

Puneeta Chellaramani, *Director, Risk & Cyber, KPMG* & Kelly Henney, *National Leader, Privacy & Data Protection, KPMG*

11:40am Break

11:50am **Government Keynote: Refining Cyber Risk Management at Department of Planning and Environment for Greater Resilience**

- Moving towards a risk-based approach within government
- Reviewing recent legislative changes around mandatory reporting within NSW
- Implementing a proactive cyber risk management framework for ongoing risk assessment and risk mitigation

Bianca Wirth, *Chief Information Security Officer*, Department of Planning and Environment

12:15pm **Panel Discussion: Tackling the Cyber Skills Shortage While Maintaining an Effective Security Strategy**

- What skills will your organisation need for an effective security strategy in the next 12-24 months?
- How do you continue to provide the right level of cyber security with a talent shortage?
- What are some of the different approaches to driving an agency culture of risk awareness in an ever-changing threat environment?
- What are your top tips when it comes to finding the right people for your team in the current employment climate?

Anna Aquilina, *Chief Information Security Officer*, University of Technology Sydney

Stephen Darragh, *Director Cyber Uplift and Reform*, NSW Department of Education

Samantha Gavel, *Privacy Commissioner*, Information and Privacy Commission NSW

Melissa Clemens, *Chief Security Officer*, Cyber Security, Service NSW

Richard Stocks, *Threat Intelligence & XDR Specialist*, Rapid7

Moderator: Gergana Winzer, *Partner*, Cyber Lead Mid-Market, KPMG

9:10am **Welcome from Chair: Strengthening Defences and Improving Capabilities to Uplift Cyber Security in Australia**

Greg Miller, *Partner, Cyber Investment, Management Consulting, KPMG*

9:25am **Government Keynote: Adaptive Policy Making for Enhanced Cyber Resilience**

- Four kinds of policy making for Cyber in government
- Adaptive policy making for cyber resilience
- How fast can we move?

Suhit Anantula, *Director, Policy & System Reform, Strategy and Policy, Department of the Premier and Cabinet*

9:50am **Government Keynote: Implementing a Cyber Security Culture and Developing Cyber Specialists**

- Building a cyber aware workforce for greater safeguards
- Developing a level of cyber advocacy within your organisation
- Filling talent gaps and promoting a rebuild of the cyber profession

Miranda Shaw, *Director ATO Cyber Hub Cyber Strategy & Programs, Australian Taxation Office*

10:15am Morning Coffee and Networking Break

10:40am Concurrent Roundtable Discussions

Roundtable 1

Supply Chain Security: Detection and Response Strategies for Third Party Risks

- Discuss the risks posed by cyber threats in your IT supply chain
- Share risk management strategies related to supply chain cyber attacks

Richard Stocks, *Threat Intelligence & XDR Specialist*, Rapid7

Roundtable 2

The Final Missing Piece Of Any Organisation's Cyber Security Strategy

Join Rubrik for a discussion on why recovery is critically important and often not discussed. Topics under discussion will include:

- What measures do you put in place to minimise the impact of any cyber incident?
- What measures do you put in place to minimise the impact of any cyber incident?
- Does your organisation truly have an assume breach mindset?
- In our roles what are we really mitigating against?
- What potential could be realised when all organisations operated with a cyber confidence?
- When was the last time you tested your cyber recovery capability?

Tristan Cox, *Account Executive*, Rubrik

11:40am Break

11:50am Government Keynote: Mitigating Against Ransomware Attacks Through Collaboration

- Reviewing breaches: what recent private sector breaches can teach us
- Implementing collaboration as a crucial tool to protect against future ransomware attacks
- Educating your workforce on the importance of implementing protections and strategies

Stuart Watt, *Chief Information Officer*, Primary Industries and Regions

12:15pm Panel Discussion: Tackling the Cyber Skills Shortage While Maintaining an Effective Security Strategy

- What skills will your organisation need for an effective security strategy in the next 12-24 months?

Chris Rush, *Partner*, KPMG

9:25am **Government Keynote: Mandatory Data Breach Reporting within Queensland Government**

- Reviewing the recommendations of Professor Peter Coaldrake regarding data breach reporting
- Reinforcing transparency and accountability through a mandatory data breach scheme: what does it look like?
- Preparing for the scheme - what can you do now to embed good privacy practices?

Paxton Booth, *Privacy Commissioner*, Office of the Information Commissioner

9:50am Fireside Chat: Identifying Sophisticated Threats to Strengthen Your Organisation's Response in a Volatile Landscape

- What are some key indicators that can help organisations identify sophisticated threats before they materialise into a major crisis?
- What steps can a department take to strengthen their response capabilities in the face of sophisticated threats, considering the ever-changing nature of the threat landscape?
- How do you foster a culture of awareness and vigilance among employees to collectively identify and respond to threats?
- In what ways can organizations leverage advanced technologies and data analytics to proactively detect and mitigate sophisticated threats, and what are the potential challenges in implementing such solutions?

9:20am **Government Keynote: Mitigating Against Ransomware Attacks Through Collaboration**

- Reviewing breaches: what recent private sector breaches can teach us
- Implementing collaboration as a crucial tool to protect against future ransomware attacks
- Educating your workforce on the importance of implementing protections and strategies

Sue Wilson, *Chief Information Officer*, Department of Communities

9:40am **Platinum Partner Session: Modern Inter-Agency Data Sharing**

- Securing users, workloads/apps
- Simplifying MoG changes
- Data Protection & Distribution
- Identity & Access Management

Louis Fourie, *Solutions Architect*, Zscaler

10:00am **Government Keynote: Technical and Strategic Recommendations for Securing your Web Applications**

- Case studies of commonly seen vulnerabilities I see during web application tests.
- What are the most common technical controls that need to be implemented.
- How to strategically plan software development projects and mitigate the likelihood of vulnerabilities.

Alex Brown, *Cyber Security Tester*, Department of the Premier and Cabinet of WA

10:20am Morning Coffee and Networking Break

10:40am Concurrent Roundtable Discussions**Roundtable 1****Effective practices for Inter-Agency Data Sharing**

- Data sharing and Public Sector
- Data sharing as multi-faceted risk
- Ensuring the security and resilience of the infrastructure

Bud Illic, *Regional Director Gov't, Zscaler*

Roundtable 2**Responding to Ransomware - Tools to Build Your Threat Defense Architecture**

- The rise and the evolution of ransomware attack
- How modern data protection capabilities can enhance an organization's security posture
- Building a Threat Defence Architecture that brings SecOps and IT Ops together

Walter Bevacqua, *Senior Systems Engineer, Cohesity*

Roundtable 3**Supply Chain Security: Detection and Response Strategies for Third Party Risks**

- Discuss the risks posed by cyber threats in your IT supply chain
- Share risk management strategies related to supply chain cyber attacks

Richard Stocks, *Threat Intelligence & XDR Specialist, Rapid7*

Roundtable 4**The Final Missing Link of Any Organisation's Cyber Security Strategy**

Join Rubrik for a discussion on why recovery is critically important and often not discussed. Topics under discussion will include:

- What measures do you put in place to minimise the impact of any cyber incident?
- What measures do you put in place to minimise the impact of any cyber incident?
- Does your organisation truly have an assume breach mindset?
- In our roles what are we really mitigating against?
- What potential could be realised when all organisations operated with a cyber confidence?
- When was the last time you tested your cyber recovery capability?

Mark Oliver, *Account Executive, Rubrik*

11:40am Break

11:50am Government Keynote: Getting a Better Return for Cyber from Policy and Regulation

- Prioritising policy development as an effective tool for cyber security
- Moving from a reactive to a proactive policy approach
- Reviewing the effects of evolving regulations and compliance on your cyber strategy

Damian Shepherd, *Director State Records*, State Records Office of Western Australia

12:10pm Gold Partner Session: Surviving Ransomware: Key Capabilities for Data Resilience

- Prevent the destruction of backup data with immutability and cyber vaulting
- Detect emerging attacks, threats, and vulnerabilities using AI/ML
- Support rapid recovery and help ensure that recovery doesn't reintroduce threats or vulnerabilities
- Assess and understand what sensitive data may have been exposed

Walter Bevacqua, *Senior Systems Engineer*, Cohesity

12:30pm Panel Discussion: Tackling the Cyber Skills Shortage While Maintaining an Effective Security Strategy

- What skills will your organisation need for an effective security strategy in the next 12-24 months?
- How do you continue to provide the right level of cyber security with a talent shortage?
- What are some of the different approaches to driving an agency culture of risk awareness in an ever-changing threat environment?
