80% of organisations seeking to scale digital business will fail because they do not take a modern approach to data governance

The lack of modern Data Governance is a big, but catastrophically under-rated problem. With government organisations across the A/NZ region focusing on modernisation, governance and information management has fallen to the wayside.

Data governance is one of the common causes of frustration, friction, delays (and failure) of business transformation. It is absolutely critical that your data governance and information management policies and practices are up-to-date and aligned to on-going modernisation.

This course will take a simple approach to the complex and ever-present problem of data governance. It will equip you with the skills to get on the front-foot by modernising your principles embedding practices and changing behaviours.

Developed and delivered by pioneers of data governance and information management in the region, it focuses on intuitive practices that are easy to adopt and embed for lasting change.

Who Should Attend

- **Heads of, Directors, Managers, Leads, Analysts of Data Governance**

- **Heads of , Directors, Managers, Leads, Analysts of Information Management**

- **Heads of, Directors, Managers, Leads, Analysts of Data Management**
