Digital Government & CX

Leading Agile SAFe

TRAINING

A 2-Part training course for government professionals to support you with the skills necessary to lead a Lean Agile enterprise

Facilitated by
GIRISH KHULLAR

Online

Day 1: Thursday, August 17, 2023

Day 2: Friday, August 18, 2023

PUBLIC SECTOR NETWORK

Certified B Corporation

This 2-Part *Leading SAFe®* training course, will support you with the skills necessary to lead a Lean-Agile enterprise.

We are excited to invite you to our first virtual training event with Agile SAFe® expert and trainer **Girish Khullar**. Join us for this comprehensive look at Agile SAFe® methodology and develop the skills needed to undertake SAFe® Agile certification.

Leading SAFe® is a course designed to teach individuals and organizations how to implement the Scaled Agile Framework® (SAFe®) to effectively manage large-scale software development projects. SAFe® is a framework that helps organizations improve their agility, increase their productivity, and achieve business results faster.

Leading SAFe® is a 2-Part training program that covers the essential elements of the SAFe® framework, including SAFe® principles, Team and Technical Agility, Agile Product Delivery, Lean Portfolio Management, and Lean-Agile leadership. You will also gain an overview of the various roles, activities, and artifacts that are part of the SAFe® framework.

Join other Executives, Directors, Managers, and Agile Change Agents leading the adoption and implementation of SAFe® within their institutions. Learn how to apply SAFe®, implement the framework, and facilitate its adoption across your enterprise.

Who Should Attend

CIOS, CDOs, COOs, CSOs and Directors/Heads of:

Information Technology, Information Security, Technology. Business Unit & Business Analysis, Digital & Digital Transformation, Development, QA, Delivery, and Infrastructure Management, Program and Project Managers, Product and Product Line Management, Portfolio Managers, PMO, and Process Leads, Enterprise, System and Solution Architects, Engineer, Systems & DevOps/DevSecOps Engineers, Operations Management

Key Learning Objectives

- **Gain a comprehensive understanding of the SAFe® framework to lead successful implementation within your institution.**

- **Learn to apply SAFe® to specific contexts for improved agility and productivity, resulting in faster time-to-market and improved mission outcomes.**

- **Align business strategy and IT execution with SAFe® methodology to maximize business value.**

- **Facilitate communication and collaboration across your organization for improved and more effective decision-making.**

- **Receive SAFe® 6 Agilist certification, demonstrating knowledge of the framework and ability to lead its adoption within your organization.**

Not Just a Training Session

- **Build your business agility and develop your team's technical agility in order to flourish in the digital age.**

- **Discover how to use Agile Product Delivery and build the skills needed to become a Lean-Agile leader.**

- **Build a deep understanding of Lean Portfolio Management and develop all of the skills required to undertake SAFe® Agilist certification.**

- **Learn how to lead the change within your organization.**

Meet Your **Facilitator**

Girish has over 16 years of experience in Agile and Waterfall Project Management, and Training Delivery. He is an Agile evangelist with learning knowledge of application delivery of new IT systems using Scrum, Kanban and Design Thinking at large scale digital transformation projects. Enabled with a unique skillset of lifting off Agile teams from scratch, an evolving leadership mindset towards agility, and the ability to setting effective OKRs and KPIs. He is also level 3 certified in Scrum.Org (among 900 certified people in the world) and hold many designations in the field of people, process, product and technology.

Apart from regular training and consulting projects, he has also managed agile transformation of multiple global organizations like Questrade, Rogers, Mobilelive, IHS Markit in full time roles. He has also been a featured speaker at various meet-up groups and Agile conferences. His latest speech was on Design Sprints at the annual Toronto Agile Conference. He additional works as a SAFe trainer with KnowledgeHut.
