Overview

This program will equip public sector professionals with the skills and knowledge necessary to develop applications using Microsoft's Power Platform – a suite of business applications encompassing Power Apps and Power Automate.

The Power Platform serves as a low-code solution for application creation, process automation, and data management. Power Apps facilitates swift and efficient low-code app development, while Power Automate (formerly known as Flow) establishes automated workflows connecting various apps and services.

This course will help you progress from fundamental to advanced concepts, acquiring hands-on experience in constructing applications, automating tasks, and effectively managing data. This course is particularly well-suited for business analysts, application developers, and power users seeking to cultivate their ability to develop low-code applications within the cloud.

Learning Outcomes

- **Understand Power Platform:** Gain a comprehensive understanding of the Microsoft Power Platform and its integral components
- **Develop Low-Code Solutions:** Gain the skills to develop low-code solutions in the cloud using the Power Platform's capabilities
- **Master Power Apps:** Learn how to build custom applications using Power Apps, from basic to advanced concepts
- **Automate with Power Automate:** Grasp how to create and manage automated workflows using Power Automate to increase operational efficiency
- **Integration Skills:** Acquire the ability to build an integrated application using Power Apps, and Power Automate.

Who Should Attend

- **Application Developers:** Useful for developers exploring low-code platforms for rapid application development
- **Business Analysts and Process Managers:** Ideal for those looking to streamline business processes through automation and application development
- **Data Professionals:** Suitable for data management professionals interested in secure, scalable data storage solutions
- **Power users and professionals interested in tech:** Open for anyone seeking to broaden their technological skill set in a rapidly evolving digital landscape

Why Attend

- **Practical Skill Acquisition:** Learn practical skills for building, automating, and managing applications using a leading low-code platform.
- **Hands-On Experience:** Engage in hands-on sessions that provide real-world application of concepts learned, fostering effective learning.
- **Efficiency Improvement:** Acquire skills to automate processes and improve operational efficiency within your organisation.
- **Stay Current:** Keep up-to-date with the latest advancements in low-code development, automation, and data management technologies.
- **Network and Learn:** Connect with industry peers and learn from their experiences, fostering collaboration and knowledge sharing.

Meet Your Facilitator

DARREN LUTCHNER
CEO/Senior Consultant
365 Assist

Darren has a 30-year career in I.T. where he has assisted many businesses from small to large in implementing, training and supporting Business Systems.

He has excellent working knowledge of the Microsoft 365 and Power Platform offering and how best for a business to implement.

Darren's customers have called him a trusted partner because he works well with others, knows how to implement software solutions and can resolve complex issues using simple and easy resolutions.

Preparation

This workshop is highly interactive with group activities and discussions throughout. Come prepared with some current challenges you are facing in your organisation.

To participate you'll need:

- A computer with camera and microphone
- Strong internet connection
- Quiet, well-lit space
- Current challenges you are facing
