Overview

Microsoft Power BI is a suite of business intelligence (BI) services that allows business users to perform sophisticated data analysis turning data into actionable insights. In this course we will introduce the Power BI Desktop program and use it to fetch data from a variety of sources and then visually present our analysis in an interactive report. We then publish the report to the online service where we create a dashboard and look at how we use both to derive business insights.

If you have a keen interest in Data and want to find ways of automating the processes of collecting, cleaning and visualising it, this is the course for you! Join us for a fun, in-depth and practical hands-on introduction to self-service Business Intelligence.

Why Attend

- Extract insights from data for more informed and data-driven decision-making
- Present complex data in a comprehensible manner, making it easier to communicate findings and trends
- Develop centralised data reporting methods and easily share information across your organisation
- Automate data-related processes, saving time and resources for other essential tasks

Learning Objectives

- Learn how to use Power Query to automate the process of getting and transforming data from a range of sources
- Understand the basic concepts of data modelling
- Discover the DAX language for data enrichment
- Create fantastic Power BI visuals and present data with style
- Understand the difference between Reports and Dashboards and how to use them in the Power BI Service

Who Should Attend

- Excel Users who create Reports
- Data and Business Analysts
- Local Data Gurus
- All Corners of Gov - Federal, State & Local

Meet the Trainer

NICKY BULL

Corporate Consultant
Blue Chameleon

Nicky Bull is a dynamic corporate trainer and consultant. She has 15 years of commercial experience as a computer programmer and analyst, and over ten years designing and delivering a range of educational programs. She lectures accounting students at Macquarie University and creator of the highly acclaimed Excel for Data Analytics Specialisation on the Coursera platform.

Nicky is passionate about learning and enabling people to use technology confidently and effectively in their workplace. She holds a BSc Hons in Computer Science, a BA in English Literature, and a Postgraduate Certificate in Education.

Preparation

This workshop is highly interactive with group activities and discussions throughout. Come prepared with some current challenges you face in your organisation.

To participate you'll need:

- A computer with camera and microphone
- Attendees must have a recent version of Power BI Desktop installed
- Strong internet connection
- Quiet, well-lit space
- Current process, automation and services challenges that you face
