

# Microsoft Azure Fundamentals

TRAINING

Kick-start your cloud adventure with  
Microsoft AZ-900T00 - Concepts,  
Services and Management

Facilitated by  
VIKAS KUMAR  
Lead Instructor

Online → 31 July 2024

## Overview

Microsoft Azure is a game changer in the world of cloud! This course will give you a chance to dive into cloud computing, understanding the ins and outs of cloud concepts, core Azure components, and those all-important security features. You will pick up some great tips on governance, compliance, and resource management too. It will enable you to get to grips with implementing and managing cloud-based solutions effectively.

Plus, Microsoft Azure ticks all the right boxes when it comes to modernising government IT. With its scalability, cost-efficiency, and top-notch security features, it's no wonder it's becoming a favourite. It enables better collaboration across departments, drives innovation, and ensures compliance with the laws and regulations around data management and privacy.

All in all, embracing Azure fundamentals is really empowering you to navigate the world of cloud computing more confidently. It's all about boosting efficiency, encouraging collaboration, and sparking innovation within our organisations.

This course primarily uses the Azure portal and command line interface to create resources and does not require scripting skills. Students in this course will gain confidence to take other role-based courses and certifications, such as Azure Administrator. This course combines lecture, demonstrations, and hands-on labs. This course will also help prepare someone for the AZ-900 exam.

## Who Should Attend

This is course suitable for professionals who are new to the world of cloud computing.

It will also benefit experienced IT managers looking to broaden their skillsets and/or looking for formal training to back up practical knowledge.

Plus those in the following roles or their equivalent

Analyst, Administrator, Architect, Specialist, Manager, Project Manager of:

- Helpdesk
- IT
- ICT
- Technology
- Software
- Cloud

## Learning Objectives

After completing this course, students will be able to:

● Describe cloud concepts

● Describe Azure architecture and services

● Describe Azure management and governance

● This course will also help prepare someone for the AZ-900 exam

## Why Attend

● Gain foundational level knowledge on cloud concepts

● Understand core Azure services

● Unpack Azure management and governance features and tools

● Benchmark and network with peers from all over the public sector

● Dial-in from anywhere!

● Gain the opportunity to be a part of a community of practice

## Meet Your Facilitator
